

RME Recommended Tech Panel Call – August 25, 2023

Summary- Background on Barnstable County's I/A Tracking database was the focus of this call. We introduced participants to the database, how it is used, how long we've been collecting data, the different parameters we track, and discussed both advantages and drawbacks to the dataset. In the next call we will discuss parameters for the RME to consider in analyzing the data from the I/A Tracking Database.

--

Alexie Rudman (AR) started call with having everyone briefly introduce themselves and give short background since there were a few new members to the panel.

AR shared presentation and gave broad overview of goal 1 of RTP (slide 2) and what expected outcome of panel will be.

George Heufelder (GH) provided a historical perspective on BAT process that was followed in the Chesapeake area.

Emily Michele Olmstead (EMO) reviewed the current IA tracking database, where the results will come from, and explained some of the disclosures that will go with the data. She also explained the many ways to filter/sort the data.

AR stated the monitoring parameters that Barnstable County does have data on and reviewed other/contextual parameters that may come into the decision process.

The call was opened up for discussion among everyone about the dataset.

AR closed the call with upcoming timeline.
